Jordan Ellis

Data Analyst · Brooklyn, New York · jordan.ellis@example.com · Sample CV for a tutorial (fictional person)

SUMMARY

Data analyst with 3 years of experience in fintech and e-commerce. I turn messy product and payments data into dashboards and A/B test readouts that teams use every week.

EXPERIENCE

Data Analyst, Ledgerly (payments startup, 40 people) 2023 – present

- Built 12 Tableau dashboards for checkout, refunds and chargebacks, used by finance and product every week.
- Wrote the SQL behind a weekly payments health report (PostgreSQL), cutting report prep from 6 hours to 1.
- Analysed 9 checkout A/B tests in Python (pandas, SciPy); one change lifted conversion 3.1%.
- Found a refund-fraud pattern worth about $40,000 a quarter and worked with risk to block it.

Junior Analyst, Brightcart (online grocery) 2022 – 2023

- Cleaned and joined order data in Excel and SQL for the weekly sales review.
- Built a customer churn report in Google Sheets used by the retention team.

SKILLS

SQL (PostgreSQL) · Python (pandas, SciPy) · Tableau · Excel and Google Sheets · A/B testing · Stakeholder reporting

EDUCATION

B.A. Economics, Hunter College, 2021
