Ama Boateng

Example applicant (fictional) · Accra, Ghana

EDUCATION

B.Sc. Biochemistry, University of Ghana 2020 – 2024

First Class Honours, CGPA 3.71 / 4.0. Taught in English.

- Final-year project: "Predicting missed clinic visits from appointment records" (logistic regression in R, AUC 0.78 on 6,200 visits).
- Courses: Biostatistics I and II, Calculus, Linear Algebra, Introduction to Programming (Python).

EXPERIENCE

Research Data Assistant, Coastal Health Survey Unit (example) Sep 2024 – present

- Clean and merge malaria survey data for 14 districts (about 38,000 household records) in R and SQL.
- Built a weekly Power BI dashboard used by 6 field supervisors; cut report time from 2 days to 3 hours.
- Wrote the data-cleaning guide now used by 2 new assistants.

National Service, Ghana Health Service district office 2024

- Entered and checked immunisation records; found 410 duplicate child records with a matching script in Python.

SKILLS

Python (pandas, scikit-learn), R (tidyverse), SQL, Power BI, Git. Basic Spanish.

RESEARCH OUTPUT

- Poster: "Duplicate records in district immunisation data", Ghana Biomedical Convention 2025 (co-author, 2nd of 4).

AWARDS AND ACTIVITIES

- Dean's List, 2022 and 2023.
- Volunteer coding tutor, Girls Code Accra, 2023 – present (taught Python to 25 high-school students).

TESTS

IELTS Academic 7.5 (Oct 2025). GRE not taken.

RECOMMENDERS

- Dr. Efua Mensah-Larbi, Senior Lecturer, Biochemistry, University of Ghana (final-year project supervisor).
- Mr. Kofi Adjei-Danso, Data Manager, Coastal Health Survey Unit (current manager).
- Dr. Yaw Ofori-Atta, Lecturer, Statistics, University of Ghana (taught Biostatistics II).

GOAL

Master's in Data Science, Fall 2027, to build forecasting tools for disease surveillance in West Africa.
